IT CONSULTING & SOLUTIONS

Osmicro Networks understand the challenges of running an efficient dental practice.

Every practice is different to the other, we provide tailored and customised solutions for your unique practice. Allowing you the opportunity to operate a more effective business without interruptions.

CLOUD & HOSTED SYSTEMS

The dental environment has changed considerably in recent years, with the demand of information to be available at a click of a button. Osmicro Networks, is a pioneer in converting on-prem systems into cloud/hosted based systems. Managers and owners now have the flexibility to operate remotely and still achieve the desired objectives of the business.

SERVICE DESK SUPPORT

Feedback tells us that every dental practice requires the , fastest, authentic and smoothest support process to keep the practice running.

For this reason Osmicro Networks, has dedicated 24hrs support, HQ is Australia based, offers service level agreements (SLA's) and an escalation process within 15mins.

This mitigates any potential risk, reduces stress levels amongst staff and patients in return creating a harmonious working environment.

DATA & CYBER SECURITY

Dental data is in high demand within the "hacker" industry and poses an enormous threat within the dental industry.

Osmicro Networks, provide solutions that prevents costly attacks and maintains the practice productivity. Enabling the practice to operate efficiently and safeguards its future from cyber attacks.

FOCUS ON YOUR WORK NOT IT

WHO WE ARE
